Did you know that the U.S. Mint produced over 25 billion Lincoln Wheatback pennies?

Wow, now that is a whole bunch of pennies. You are more likely to find a 1944 (p) copper penny than any other wheatback. You are least likely to find a 1909-S which makes these a very valuable wheatback to own.

Below you will find each variety of wheatback minted along with the mintage amounts.

To the right you will find the odds that any wheatie you find may be that year/mint.

=====
